

INSIGHTS SUMMARY

Turn qualitative safety data into actionable insight. *Instantly.*

SafeTower helps safety teams understand large volumes of qualitative data without manual review, filtering, or guesswork. Key issues, high-risk submissions, and cross-module patterns are surfaced quickly so teams can move from awareness to action.

Summarize

LARGE DATASETS INTO CLEAR THEMES

Surface risk

HIGH HARM AND HIGH POTENTIAL FOR HARM

Connect signals

STAFF EVENTS AND PATIENT FEEDBACK

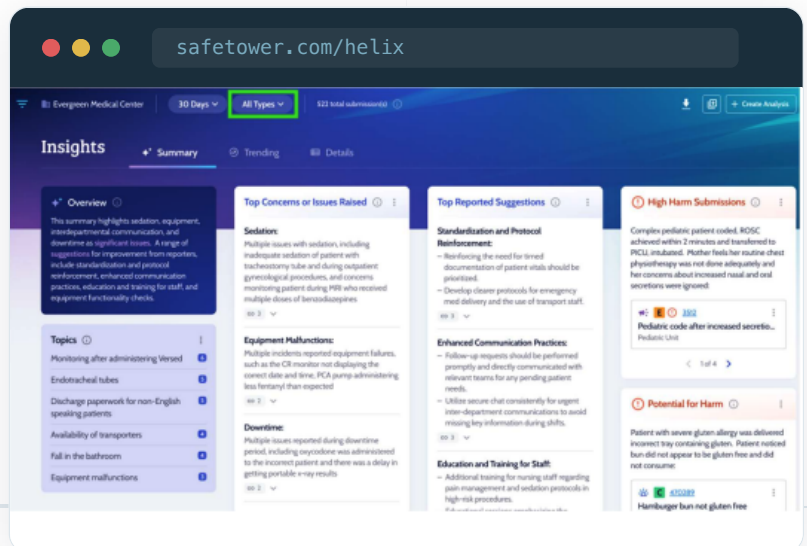

Connect the dots across your data to surface high-risk issues and emerging patterns.

FROM DATA OVERLOAD TO CLARITY

Find the themes hiding in the narratives.

Gives teams a concise view of emerging trends across submissions, with direct links to the source records behind each issue.

- Key issues and themes from selected datasets
- Source-linked submissions for fast review

CORE CAPABILITIES

Designed for faster, more confident safety intelligence.

AI

AI summaries

- Plain-language summaries of safety data
- Clear themes without manual review

!

Risk surfacing

- Flags high harm and high-potential cases
- Helps teams catch near misses earlier

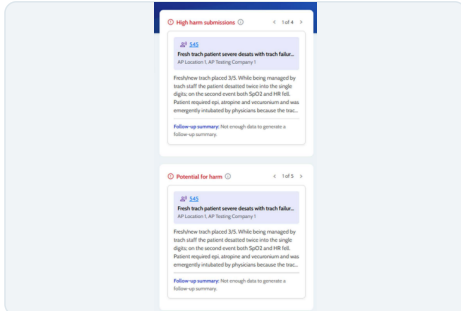

CM

Cross-module view

- Combines events and concerns
- Reveals patterns hidden in silos

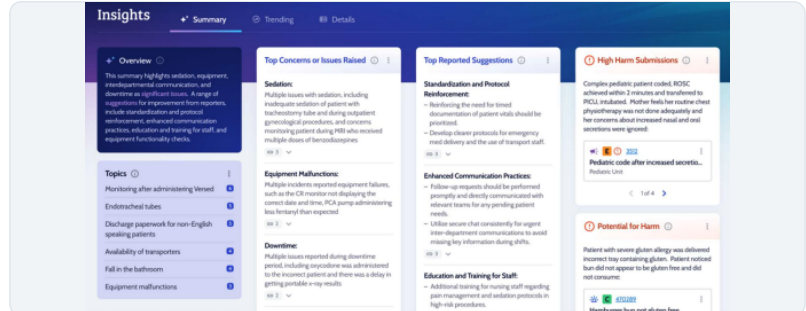

High-risk narratives and cross-module insight in one view.

High harm and potential for...

The summary can spotlight severe or high-potential submissions, even when original scoring may understate risk.

Cross-module analytics

When safety events and patient feedback are viewed together, patterns emerge that are often missed in separate systems.

Save time. Surface what matters. Protect patients and caregivers.

IMPLEMENTATION

Up and running with guided setup.

01

Select your dataset

Choose Safety Events, Patient Feedback, or both modules.

02

Generate summary

Create a concise overview with one click.

03

Review sources

Open linked submissions behind each theme or risk.

04

Act faster

Prioritize follow-up using clearer, earlier signals.

WHO IT'S FOR

Built for safety leaders at every level.

RS

Risk & Patient Safety

Summaries, high-risk signals, source links, and action-oriented review.

QL

Safety & Quality Leaders

System-level visibility into safety, experience, and emerging patterns.

EX

Executives

Fast, clear readouts on patient safety performance and priorities.
